SNEHA MAURYA

MCA Student | Product Design · UI/UX · AI Prototyping · Frontend Development

Nashik, Maharashtra, India | snehamaurya12200@gmail.com | LinkedIn: sneha-maurya | GitHub: snehamaurya12200-design

PROFESSIONAL SUMMARY

MCA student focused on product design, UI/UX, and AI-assisted product development. Combines product thinking, user-centered design, and rapid prototyping to create accessible, tactile digital experiences. Builds and explores projects across interface design, frontend development, and AI-enabled product concepts.

EDUCATION

Master of Computer Applications (MCA) 2024 — Expected 2027

Sandip Institute of Engineering and Management (SIEM) · Nashik, Maharashtra, India

- Specializing in software architecture, advanced computing systems, and Human-Computer Interaction (HCI).
- Active postgraduate candidate currently in progress.

Bachelor of Business Administration in Computer Applications (BBA-CA) Graduated Foundations

Undergraduate Computer Applications & Business Systems · Maharashtra, India

- Core training in relational databases (SQL), systems analysis, and product viability models.

SKILLS & COMPETENCIES

- **Product & UI/UX Design:** UI/UX Design, Product Design, Web Design, Figma Design Systems, User Flows, Wireframing, Usability Heuristics (WCAG AA)
- **AI & Rapid Prototyping:** AI-Assisted UI Code, Prompt Engineering, Multimodal Workflows, Gemini API Integration, Context Guardrails
- **Frontend Development:** React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design, Vercel Deployment
- **Programming & Systems:** Python, C, C++, SQL, Relational Queries, Java (Basic), Data Structures & Algorithms, Git / GitHub

SELECTED PROJECTS

1. **Your Life, In Receipts** [Top 5 Finalist · Live Shipped App]

   WebRush 6-Hour Solo Buildathon | Live: https://yourlifeinrec.vercel.app/

   Built and deployed an experimental frontend application solo under a strict 6-hour sprint. Converts Spotify streaming metrics into tactile thermal cash-register receipts with barcode generation and polygon tears.

   Technologies: React, TypeScript, CSS Polygon Math, Vercel Edge

1. **The First Week** [Interactive Web Concept]

   Student Onboarding Experience | Live: https://first-week-of-clg.vercel.app/

   Empathetic college orientation web app replacing sterile checklists with conversational schedule matchmaking and anxiety-reducing roadmap milestones. Designed clickable prototype.

   Technologies: User Research, Information Architecture, Figma, React

1. **Mood Money** [Behavioral UX Concept]

   Behavioral Finance Mobile Concept | Live: https://mood-money-hackathon-12.vercel.app/

   Gen Z personal-finance concept designed to mitigate impulse purchases through 15-minute checkout pause friction loops and emotional spend-tagging.

   Technologies: Behavioral UX, Mobile Design, Gamification Heuristics

1. **AccessGap & Udyog Mitra** [Active Architecture Specs]

   Civic Accessibility Platform & Vernacular AI Copilot

   Engineered civic accessibility audit workflow (Audit !' Score !' Fix !' Prove) and Hindi-first shopkeepers.

   Technologies: Multimodal Voice UX, WCAG Auditing, Design Tokens

STARTUP EXPERIENCE

Product Designer — StuMate MVP 2024 — 2025

- Conducted user research interviews with 28 university students to uncover academic collaboration roadblocks.
- Designed responsive discovery feeds, study room scheduling, and peer chat loops in Figma.
- Authored StuMate design system component library, accelerating frontend handoff for engineers.
- Shipped MVP that onboarded over 500 active beta students across campus pilot groups.

HONORS & ACHIEVEMENTS

& **1st Runner-Up — NexaForge × Unstop AI Prompt Challenge (2026)**
National AI prompt and generation challenge recognized for multimodal precision and creative direction.

& **Top 10 Finalist (6th Place, Score: 96.0/100) — Prompt Run 2026**
Recognized by Frontend Arena × Unstop for frontend engineering and UI craftsmanship.

& **Rank #28 — WebRush 2026 6-Hour Frontend Hackathon**
Solo rapid build and live deployment of "Your Life, In Receipts" out of 140+ teams.

& National Space Tech Participant — ISRO Bharatiya Antariksh Hackathon (2024)
National space tech hackathon addressing geospatial visualization problem statements.
